

Wooden screens may be considered as fences in terms of the regulations concerning the height of fencing on boundaries. Please refer to your national regulations and local zoning maps.

Privacy barriers

Highly visible protection

The lightweight solution to avoid unwanted stares

Our privacy barriers meet purely aesthetic requirements; they serve no acoustic purpose.

With reduced dimensions in relation to solid walls, they constitute the ideal fence thanks to their ease of installation and attractive finish, at very reasonable prices.

The warmth of wood finds its full dimensions in the urban environment

- No unnecessary excess performance.
- Greatly flexible dimensions.
- Aesthetics of wood.

Privacy barriers
