Douglas fir: the specie with a big heart

On account of its structure, the Douglas fir is a natural choice as it is an exceptional material in terms of quality and natural durability. Its heart is deemed to be rot-proof. By 2015, France will have the largest Douglas fir resource in the world. A leader in the use of the Douglas fir since the 1980s, Tertu has continued to develop, using this specie in increasingly sophisticated applications: guardrails, sound barriers and protections, gangways, bridges and other crossings.

*Pressure-treated wood
with chromium and
arsenic-free preservatives*

Integrated solutions for laying out your spaces

► Acoustic barriers

Tertu provides absorbing or reflecting barriers depending on the site characteristics.
Every Tertu acoustic barrier is CE marked and responds to the EN 1793 norms.

► Fences

Tertu has a very wide range of fences to fit your needs and insure economic solutions.

► Equipment for roads and car parks

Equipment for roads and car parks are designed for complete proposals of laying outs, markings and protections.

► Pedestrian parapets

Tertu pedestrian parapets are solutions to protect pedestrians tested according to French standards XP P98-405 & NF P01-013.

Solid wood or Mixed Wood & Steel gangways, pathways and access for Persons with Reduced Mobility

► Solid Wood gangways

Tertu solid wood gangways are made with big diameter logs for a span up to 8 m. Non slip flooring. For pedestrians.

► Decking and Stilts

Tertu decking and pontoons can be installed on the ground or on stilts. The maximum support spacing can be up to 4 m. Non slip flooring.

► Mixed Wood & Steel gangways

Tertu Mixed Wood & Steel gangways are wooden cladded steel structure, their span can be up to 50 m. Non slip flooring. For pedestrians and/or small vehicles.

► Access for Persons with Reduced Mobility

Tertu wooden ramps are designed according to the regulations for Persons with reduced Mobility. Slopes from 2 to 8% with intermediary stages depending on the available installation space. Adjustable jack feet for a quick, easy and accurate installation. Rise up to 0.70 m in a standard version.
